RETAIL BUSINESS MANAGEMENT

Course Code: COM3MN208 • Module 1 Notes

Module I: The Retail Function

Retailing comprises all activities involved in selling goods or services directly to final consumers for personal, non-business consumption, serving as the final stage of economic distribution.

Unit 1: Introduction to Retailing – Role of Retailing

- 1. Economic Role:** Connects manufacturers with household consumers, creates time, place, and possession utilities, and generates mass employment opportunities.
- 2. Strategic Position:** Acts as the primary touchpoint collecting real-time consumer demand trends for upstream supply chains.

Unit 2: Organised vs. Un-organised Retailing – Retail Life Cycle

- 1. Format Classification:** Organised retail (licensed, corporate-managed chain stores like Reliance Retail, DMart) vs. Un-organised retail (traditional family-owned Kirana stores, street vendors).
- 2. Retail Life Cycle Stages:** Innovation → Development (rapid growth) → Maturity (intense price competition) → Decline / Adaptation.

Unit 3: Overview of Retail Industry in India – Problems & Prospects

Rapid urbanization, rising middle-class disposable income, and FDI inflows drive modern trade growth. Key challenges include high commercial real estate costs, supply chain bottlenecks, and Kirana resilience.

Unit 4: Multi-Channel Retailing – Franchising & Non-Store Retailing

Multi-Channel Distribution: Integrating physical stores, e-commerce websites, and mobile apps.
Franchising: Business model where franchisor grants brand license and operating system to franchisee (e.g., McDonald's, Bata).

Unit 5: Functions of Retailing – Value Addition & Bulk Breaking

Four core functions: Providing product assortments, breaking bulk (converting wholesale cartons into single units), holding inventory, and providing customer credit & extra services.

Practical Case Framework (Organised vs. Un-organised Retail Comparison Matrix): Compare structural operational parameters between Indian Organised Chains and Traditional Kirana Stores.

Comparative Retail Sector Analysis:

Parameter	Organised Retail Chains	Un-organised Retail (Kirana)
Store Format	Chain Store	Family-owned
Scale	Large	Small
Location	High-traffic areas	Local neighborhoods
Inventory	Centralized	Decentralized
Product Range	Broad	Narrow
Price	Competitive	Higher
Customer Service	Standardized	Personalized
Technology	High	Low
Logistics	Efficient	Fragmented
Financing	Formal	Informal
Growth	Rapid	Slow
Resilience	High	High

Operational Parameter	Organised Retail (e.g., DMart, BigBasket)	Un-organised Retail (Traditional Kirana)
Legal & Tax Registration	Corporate entities registered under GST & Shops Act	Sole proprietorship / informal family operations
Supply Chain & Sourcing	Direct manufacturer sourcing via central warehouses	Local wholesale market distributors & brokers
Technology Integration	POS barcode scanners, ERP systems, digital wallets	Manual cash registers / basic UPI QR standees
Customer Relationship	Standardized loyalty points & mass promotions	Personal familiarity, neighborhood credit (Khata)
Operating Margins & Scale	Low unit margin, high volume & economies of scale	Higher unit markup, localized neighborhood footfall
